

## Generating a Paper Profile

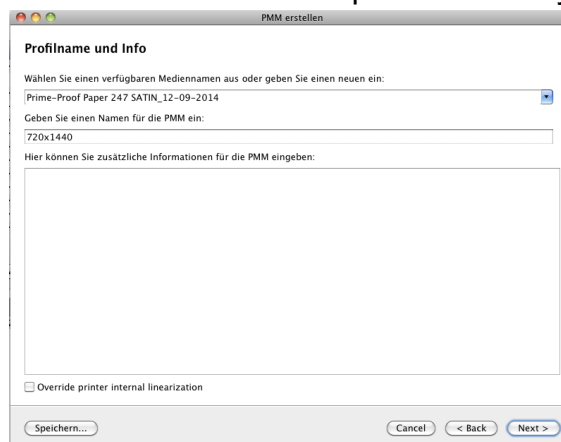

Click [+] in the center window

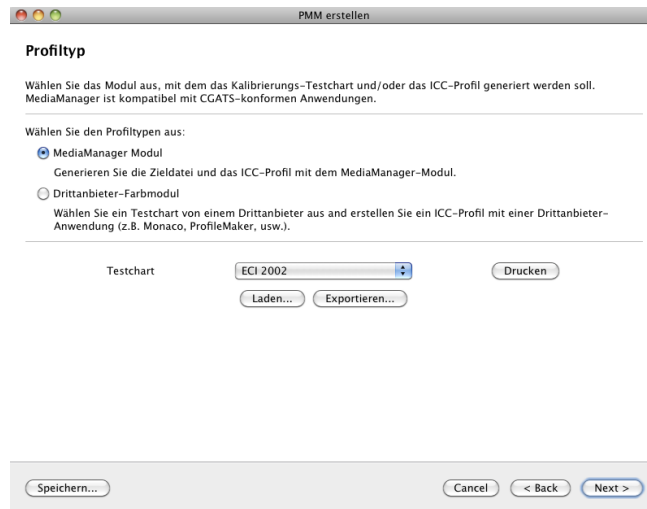

Select a paper type which is most similar to your paper

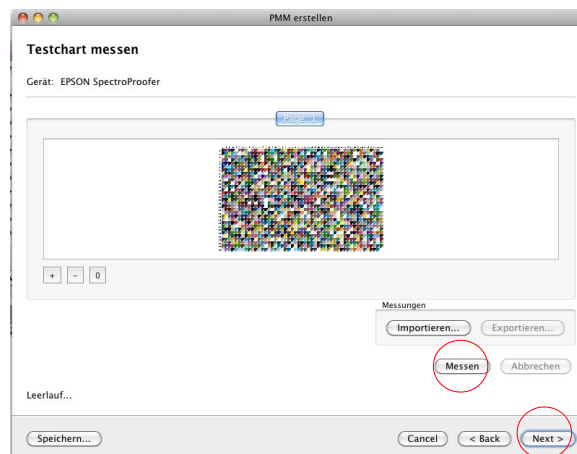

Type in a individual name for the profile and for your PMM

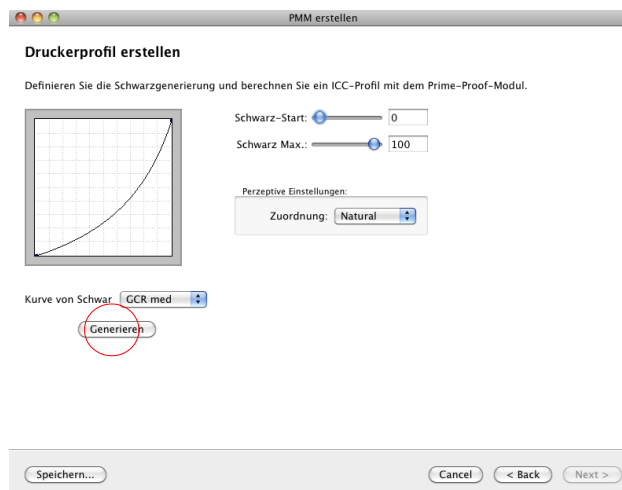

▼  
Select a target and click "Print" or "Drucken"

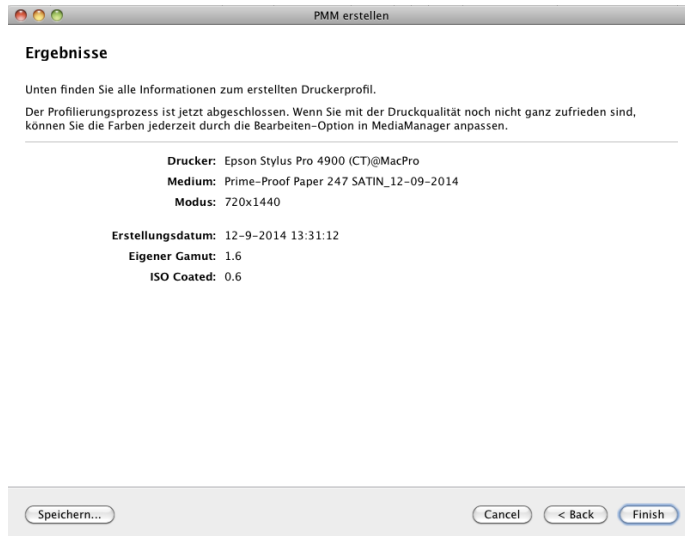

▼  
Import the measured values by clicking "Measure" or "Messen" and "Next"

▼  
Click "Generate" or "Generieren" to make your profile (this will take some time) then click "Next".

▼  
Click "Finish"

▼  
Now your new paper will appear in the left window of the Prime-Proof Calibrator
